DERMELECT® REVITALEYES TREATMENT

*de-bagging, line-smoothing,
and dark circle diminishing*

DERMELECT® REVITAL EYES TREATMENT

Eyes may be the "mirror of the soul" but they really do take a beating by constantly being bombarded by dust, smoke, UV light and other irritants. Not to mention the makeup that is constantly put on them just to be scraped off again. Compound that with the stress and lack of sleep and is it any wonder that your eyes require a special treatment?

The skin under the eyes is much thinner and contains fewer glands than on the rest of your face- making it drier, more prone to wrinkles, puffiness and dark circles. Provide yourself with a pampering regimen for relief and relaxation on an ongoing basis and reintroduce that sparkle to your eyes.

PREPARATIONS: Start by de-stressing. Take 4-6 long, deep breaths. Banish negative tension by slowly massaging (counter-clockwise) with the first two fingers of each hand, small circles to your temples. To relax your brow area, gently pinch, with a thumb below each eyebrow and index finger above. Lift each brow out to the temples. If available, an extended steaming will do wonders for the dark circles.

WHAT TO USE:
**DETOXIFYING OXYGEN (O₂)
 FACIAL COMMISSION**

WHAT TO DO:

The effectiveness of your entire skincare regimen rests on cleansing correctly. Layer a generous amount evenly over damp face and throat. Allow oxidation to foam into a luxurious masque. Leave on for a couple of minutes allowing product to draw out impurities and hydrate the skin. Rinse well with lukewarm water.

LINE CORRECTION EYE GEL

Keep the jar in the refrigerator- realize the added cooling effect as it conforms to the gel. Gently circle the gel around the eye area with a light tapping motion. Allow the droplets to absorb. Continue to apply daily to and around the eye area.

**REVITALITE EYELID &
 DARK CIRCLE CORRECTOR**

Gently massage over eye area, including under-eye, eyelid, brow bone and side area. Never rub! Reapply two more times during the day and repeat daily.

**CONFIDENCE INJECTION
 CREAM CONCENTRATE**

Apply in between eyebrows, above the nose, on the forehead and to the temples. Allow to absorb.

AGE DEF-EYE CREAM- SPF 15

Dab and tap lightly onto the orbital bone (around the eye socket) and the cream will travel to where it's needed. Reapply as needed especially prior to exposure to UV rays.
